

How To Write A Book Using Chat GPT

It's never been a better time to write a book. Here are your steps and prompts to crank out a book quickly. Open your AI writing tool of choice and follow these steps:

- "I'd like to write a book about (Your Topic). The target audience would be (Describe your reader). The main problem this book would solve is (write a little about what problem you are solving with this book). Please provide a bullet list of ten interesting chapters in this book."
- "Please provide another ten examples of chapters in the book."
- Open a new document in a word processor of your choice (Pages, Word, or Google Docs). Copy and paste your best 10-12 topics into the doc.
- Create a new page in your document called "Chapter One"
- Take one of the chapter topics back to Chat GPT. Prompt: "If (the first chapter heading you want to write about) were a chapter in my book, what would be the best points to include? Provide the points in a bullet list."
- Now you need a story to introduce the topic to bring the message to life. Prompt: "Write an interesting allegorical story of a (your ideal reader) who struggled with (chapter heading). Make it a happy ending." Paste the response at the beginning of the chapter. Try again if you don't like the story.
- Now you need an introduction to transition to the content. Prompt: "Write an introduction for a chapter about (Chapter heading). Include some important chapter elements such as (paste the bullet point outline from the chapter)."
- Copy the bullet points and paste them under the heading of Chapter One.
- Copy the first point and go back to Chat GPT. Prompt: "Write a compelling paragraph about (Paste the point here)."
- Copy the second point from your document and give the same prompt "Write a compelling paragraph about (paste point two here)."
- Repeat until you have enough text to form the bulk of your chapter.
- Finally, you need a conclusion. Prompt: Write a concluding paragraph for this chapter.
- Make sure you read through everything and adjust for your own voice.
- Run it through Grammarly
- Hire a copy editor go over it and suggest changes
- Create a book cover from a vendor on Fiverr or some other freelance service.
- [Publish your book on Amazon.](#)
